After a 7 year research study, a senior staff aerospace defense engineer, George J. Bugh, concludes economically free energy and even antigravity are possible. A 7 year study of "free energy" devices, sometimes called "over unity" devices, was done to determine if any of these devices generated power by transferring energy from unknown sources and if so to determine where the energy was coming from.

Free energy devices have been around for a very long time now. I have stood beside a water mill and its power is scary as it could crush you in moments and never even notice. That mill is on a quietly flowing small river and it can operate at any time day or night without anyone having to pay anything for the power which it uses.

Cool device. It is right that the energy is not free; it is waste energy from electric devices, electric transport and radio waves. Free as in free of charge. Really cool would be to take energy from the rotation of the planet. Would need 1-2 satellite/s going in opposite direction. Basically to have a fix-point outside the planet.
