A tyre pressure monitor system (TPMS) is an electronic safety system designed to constantly monitor the pressure and temperature of your tyres. Tyre pressure monitors alert you when the pressure drops below or rises above the set range, prompting you to take action and return the air in your tyres to the appropriate amount, significantly extending the life of your tyres.

I removed my box of goodies for my TPMS system today to see what had to be done to install the remainder of the system. The RV wheel inserts were installed by Heartland. All I have to do is install the monitor, cables and antenna. I located all of the parts per the installation manual, but was puzzled by one extra wire. This wire has a plug with the ground connector exposed on one end (much ...
