Goat Production Handbook - HPSA

A sheep-goat hybrid (called a geep in popular media or sometimes a shoat) is the offspring of a sheep and a goat. While sheep and goats seem similar and can be mated, they belong to different genera in the subfamily Caprinae of the family Bovidae. Sheep belong to the genus Ovis and have 54 chromosomes, while goats belong to the genus Capra and have 60 chromosomes.

INDIGENOUS GOAT PRODUCTION HANDBOOK

Sheep and goats (small ruminants) form an important economic and ecological niche in the agricultural systems. They form an integral and important component of the pattern of animal production in most rural communities. Sheep and goats are mainly kept for immediate cash source, milk, meat, wool, manure, and saving or risk distribution.
