I've got a small problem with a EWF1080 Front loader Washing machine, it times out on the first fill of water, gives a E10 code, and requires a reset button operation to get it to continue filling water and then its alright. I've checked water pressure and had a general look under the bonnet, its either a board fault that has changed a

LW8203W2

If the washing machine is making a squeaking sound, the tub bearings may need lubrication. The washing machine motor drive belt or pulley may be worn out. This is a rather involved repair, where you need to take apart a significant section of the machine to get to the motor. The pump pulley belt may be cracked, frayed, or
