## **Whats Your Problem Identifying And**

This page covers the first two stages in the problem solving process: Identifying the Problem and Structuring the Problem.

# Where To Download Whats Your Problem Identifying And Solving The Five Types Of Process Problems

Stage One: Identifying the Problem. Before being able to confront a problem its existence needs to be identified. This might seem an obvious statement but, quite often, problems will have an impact for some time before they are recognised or brought to the attention of someone who can do anything about them.

## **Problem Solving - Identifying & Structuring Problems ...**

A problem can be regarded as a difference between the actual situation and the desired situation. This means that in order to identify a problem the team must know where it is meant to be and have a clear understanding of where it currently is in relation to the perceived problem.

## **Identify and Define the Problem**
