Ford 351 Windsor 345 HP High Performance Balanced Crate Engine

The Ford 351W or 351 Windsor is classic American muscle. Part of the 90 degree small block V-8 family of Ford engines, the 351 Windsor reached its peak stock horsepower in 1969 at 290. Though this small block is a platform capable of much greater performance, you can easily modify it to make more horsepower and torque.

351W Performance Tricks | It Still Runs

351w Power kits We have taken the guess work out of getting the most bang for your \$\$. We have rebuilt tons of customer engines over the years that were all wrong and had parts that didn't work together. Examples race camshaft and torque intake, or stock heads with a tall single plane intake manifold.

351w Power Kits | Barnett High Performance

The 351W (so identified to distinguish from the 335-series Cleveland 351C) uses a taller block than the other engines in the series to avoid excessively short connecting rods. And for a brief time in the early 1980s a version with a smaller bore diameter that displaced 255 cubic inches (4 l) was produced as Ford struggled with emissions and fuel economy.

Ford small block engine - Wikipedia

Starting with a bone-stock 351W truck engine, we bored the block 0.020-inch over, fitted KB flat-top pistons to the stock crank and rods, installed a Crane hydraulic roller cam, and reassembled the...

Build A 505HP Ford 351 Windsor - Hot Rod

Ford offered two versions of the 351 engine, a Windsor 351 and a Cleveland 351. The Windsor motor is considered a small block. The Cleveland 351 is between a small block and a big block. Even though the Cleveland 351 came from the small block family, few parts will interchange.

351 Engine Specifications, Cleveland, Windsor, Boss ...

The 351 Windsor engine is an 8 cylinder, 90 degree, overhead valves (OHV) engine. It was introduced in 1969, and got its name from the Windsor Canada location of the Ford assembly plant that built them. There were two versions introduced in 1969, the 250 hp 2 barrel engine and the 290 hp 4 barrel version.

351 windsor engine for sale | eBay

Ford 351 Windsor Engine (image/Hemmings Motor News) The 351W is named for the factory in Windsor, Ontario that produced them. It is part of the long-running Ford small block Windsor V8 family, which also includes the venerable Ford 302 (5.0L) V8.

What's the Difference Between a Ford 351 Windsor ...

Getting it's name from the Windsor engine plant, the 351W is a favorite among Ford enthusiasts. Often mistaken for a 289 or 302, the Windsor features an entirely different block which is much stouter and has a taller deck height. While the heads will interchange with other small block Ford engines, the 351W requires a unique intake manifold.

Shop 351W Ford Small Block V8 Parts | Speedway Motors

The main difference between the blocks was the Deck Height. The 351 blocks were as much as 1.300 in. taller to allow for a longer Stroke. You can spot the difference pretty easily by looking at the front of the engine. On a 302 (or smaller c.i.d.) blocks, the distributor mount is almost flush with the top of the block (where the intake sits).

What's the difference between a 302 and a 351W?

Ford 351 Windsor Engine The 351W is named for the factory in Windsor, Ontario that produced them. It is part of the long-running Ford small-block Windsor V8 family, which also includes the venerable Ford 302 (5.0L) V8. It shares the same small block V8 bellhousing pattern and motor mounts of the August 1964+ Windsor engines*.
