A Friendly Introduction to Graph Theory - Fred Buckley, Marty Lewinter - Google Books. This book introduces graph theory, a subject with a wide range of applications in real-work situations. This...

A Friendly Introduction to Graph Theory - Fred Buckley ...

A graph is a structure that represents the connections between objects. They can be used for social network analysis, working out someone's Erdős number, finding the shortest path through a maze, and many other applications. We'll be calculating the path between two countries with the least border crossings.

A Practical Introduction to Graphs (Network Diagrams ...

Introduction¶. When we develop a model for probabilistic classification, we aim to map the model's inputs to probabilistic predictions, and we often train our model by incrementally adjusting the model's parameters so that our predictions get closer and closer to ground-truth probabilities.. In this post, we'll focus on models that assume that classes are mutually exclusive.

A Friendly Introduction to Cross-Entropy Loss

We assume nothing more than a good grasp of algebra. Thus, A Friendly Introduction to Graph Theory provides early access to this wonderful and useful area of study for students in mathematics, computer science, the social sciences, business, engineering—wherever graph theory is needed. This tutorial offers a brief introduction to the fundamentals of graph theory. Written in a reader-friendly style, it covers the types of graphs, their properties, trees, graph traversability, and the concepts of coverings, coloring, and matching.

Graph Theory - tutorialspoint.com

A Friendly Introduction to Number Theory is an introductory undergraduate text designed to entice non-math majors into learning some mathematics, while at the same time teaching them how to think mathematically. The exposition is informal, with a wealth of numerical examples that are analyzed for patterns and used to make conjectures.

A Friendly Introduction to Number Theory

In order to graph a linear equation you can put in numbers for x and y into the equation and plot the points on a graph. One way to do this is to use the "intercept" points. The intercept points are when $x = 0$ or $y = 0$. Plug $x = 0$ into the equation and solve for y
