The Information Age has changed people, technology, science, economies, culture, and even the way people think. The Internet is arguably the most prominent innovation of the Information Age. The Internet changed the way people do everything. It has made people lazier, but it also makes a large amount of the population smarter.

Information Age - History of Technology

According to the United Nations Public Administration Network, the Information Age was formed by capitalizing on computer microminiaturization advances, which, upon broader usage within society, would lead to modernized information and to communication processes becoming the driving force of social evolution.
