Crowns and bridges. We use crowns made of full ceramic material, because they allow light to come through. This means you won't be bothered by dark edges. Are you missing one or more teeth? Then a bridge can give solace. The dentist slightly reduces the size of the teeth on both sides of the gap. They will serve as pillars to attach the bridge.

Crowns and bridges - Atlas Kliniek

attached to the crowns. Initially, the dentist prepares teeth on each side of the space to receive crowns and makes an impression of the entire area. Fits a temporary or transitional bridge made out of plastic or metal. Permanent Bridge In a subsequent visit, the dentist removes the temporary bridge, places, adjusts, and cements the fi xed bridge.

Benefits of BRIDGES & CROWNS. In addition to strengthening a damaged tooth, bridges and crowns can be used to improve a tooth's appearance, shape, alignment and dental occlusion (bite). Gaps left by missing teeth can cause the remaining teeth to shift, which can result in a bad bite. Bridges and crowns help prevent this from happening.
