Supersedes AWS D17.1:2001 Prepared by the American Welding Society (AWS) D17 Committee on Welding in the Aircraft and Aerospace Industries Under the Direction of the AWS Technical Activities Committee Approved by the AWS Board of Directors

Specification for Fusion Welding for Aerospace Applications

In 2001, after years of hard work by the committee members, the American Welding Society issued AWS D17.1:2001, Specification for Fusion Welding for Aerospace Applications. Specifications used for aerospace welding deal primarily with fusion welding, except for the relatively few that deal with friction welding.

AWS D17.1 | Welding | Specification (Technical Standard)

The tube is 0.375" OD, with 0.049" wall thickness. This test is according to the AWS D17.1. If you are familiar with the D17.1 fillet test, there is a stringent requirement for root fusion. Some more particulars: I am using a Miller Aerowave, with 1/16" lanthanated tungsten (with a small, blunt taper), and a gas lens.
