Blood Glucose Monitoring Devices | FDA

Unlike a blood sample, control solution does not contain any blood cells, interferents, or blood products and is less viscous than blood. Control Solution necessarily reacts differently than blood (more viscous) when applied to the test strip. Therefore, the results of a glucose control test do not reflect a true blood glucose value.

Frequently Asked Questions regarding Control Solution Testing

Glucose control solutions should also be used with a new system, when one experiences an unusually high or low blood glucose result, if a strip vial has been left open or has been exposed to environmental factors (as mentioned above) or if a meter has been dropped and/or damaged.

Glucose Control Solutions for Diabetic Glucose Meters ...

You can check on the accuracy of your blood glucose meter by performing a control solution test. This involves performing a test using control solution instead of blood. If you do not have any control solution or it is no longer in date, many meter manufacturers will be happy to send you a vial of control solution free of charge.

Guide to Blood Glucose Meters (Blood Glucose Monitors)

Some meter companies also suggest other reasons to use control solution: before testing with a new meter for the first time and when blood glucose results don't reflect how you feel. Unfortunately, the cost and hassle of ordering the perishable liquid, as well as having to use a precious test strip, may cause people to ignore control solution.
