Note to would-be evolution defenders: please read the full brochure and linked articles before attempting to answer the questions, otherwise you will likely be wasting your time boxing at shadows. Also, please look at the answers that have already been put forward (see the 3-part series on responses under Related articles below), or you could ...

Question evolution - creation.com

The answer to this question is challenging, since paleontologists have only partial information on what happened when. So far, scientists have been unable to detect the sudden "moment" of evolution for any species, but they are able to infer evolutionary signposts that help to frame our understanding of the emergence of humans. Strong evidence supports the branching of the human lineage ...
