A supplemental nursing system (SNS) or supplemental feeding system is a way for you to nurse your baby and give her formula (or expressed breast milk) at the same time. The supplemental formula or milk travels along thin, flexible tubes that are taped (with paper tape) along your breasts to the ends of your nipples.

For Dairy Cows
Napier grass is widely considered to be the most important feed for dairy cattle since it encourages milk production, weight gain and growth; however, Napier grass is made up of 70 to 80 percent water which means that the cows will only get 20 to 30 percent of dry matter.
