the motion or operation of a machine in several ways. The most basic involves manual control, where a human or robotic users flips a switch, pulls a lever or turns a steering wheel. This motion drives hydraulic fluid throughout the system to accomplish the desired action.

RANGER systems are a simple, cost-effective way to retrofit a wireless remote on a manual hydraulic system with 4 to 6 axes of variable speed control. The package is supplied with electrical actuators to stroke the valves in both directions, and all hardware to connect the actuators to the valve handles or linkages.
