Manual cars are about \$1,000 cheaper than automatics on average, as of 2019. In addition, older manuals have a greater fuel economy than automatics of a similar age. That's not just because manual cars lack fuel-draining torque converters. It's also because manual cars have lighter transmissions.

Manual vs Automatic - Pros and Cons

A car needs a full working transmission (or gearbox) in order to allow the vehicle to change gears, but the inner workings of a vehicle differs greatly between a manual transmission car and an automatic transmission car. A manual car is recognisable from the inside, as it contains a clutch pedal, which is used to change gears, as well as a gear shift stick between the two front seats, which offers full control of the car and between 5-6 gears and reverse.

Manual vs. Automatic Car Transmission: Which is Best?

Without getting too technical, the main difference is that automatic cars don't have a clutch pedal. You also have a simplified gearbox. Manual transmission cars have five or six gears, plus reverse, giving you full control over how the car performs. Automatic cars tend to have four modes: Park - P.
