Formal environmental science (ES) education in higher education institutions (HEIs) in the UK has been developing over forty years. The aim of this two phased project is to try and map this complex landscape over time by investigating recent provision from a number of perspectives and to make recommendations as to future directions and work.

Mapping the Environmental Science Landscape | www.the-ies.org

Systematic mapping was developed in social sciences in response to a lack of empirical data when answering questions using systematic review methods, and a need for a method to describe the literature across a broad subject of interest. Systematic mapping does not attempt to answer a specific question as do systematic reviews, but instead collates, describes and catalogues available evidence ...
