The Scientific Method

Marcelle Brown, who co-chaired the science fair with Terri Sauerbrun, explained that the students followed the scientific method: stating the problem, formulating a hypothesis, listing materials, performing an experiment, analyzing data, and drawing a conclusion. "The student-scientists were given recommendations to make their experiments better and had the opportunity to explain why their experiments may or may not have proven their hypotheses," Ms. Brown stated.

Mastering the Scientific Method

The scientific method is a series of steps followed by scientific investigators to answer specific questions about the natural world. It involves making observations, formulating a hypothesis, and conducting scientific experiments. Scientific inquiry starts with an observation followed by the formulation of a question about what has been observed.
