Isometric projection is a method for visually representing three-dimensional objects in two dimensions in technical and engineering drawings. It is an axonometric projection in which the three coordinate axes appear equally foreshortened and the angle between any two of them is 120 degrees.

Isometric projection - Wikipedia

is a plane having the vector $n = (a, b, c)$ as a normal. This familiar equation for a plane is called the general form of the equation of the plane. Thus for example a regression equation of the form $y = d + ax + cz$ (with $b = -1$) establishes a best-fit plane in three-dimensional space when there are two explanatory variables.
